It's time we all understand that there is a pervasive "corporate culture" regarding operating in ethical ways: "Make me". So, your honor, this is as good a place as any to start. Let the punishment, for bad faith and anti-competitive actions backed by corporate officers from the top-down, reflect the public interest more accurately than the settlement deemed acceptable by the President and the other states. This management style has seriously damaged our country. It has and continues to demoralize and victimize honest workers all over the nation; farmers, factory workers, imported engineers, physicians, nursing home aides, etc .....

Help restore confidence in the American system of justice. Start with this decision.
